

What is the link between Paradise Dam on the Burnett River, and the proposed dam at Traveston Crossing?

It's all about people

Same CEO

Same people responsible the EIS

Same promises about environmental sustainability

Same promises about economic benefit

Same promises about jobs

However -

People can compare promises with reality

the broken promises from Paradise should inform
the assessment of the EIS for Traveston Crossing

Photo of laser projection onto the Paradise Dam wall.

(This dam stops the Burnett from flowing in dry times, and has completely blocked all downstream fish passage)
