

# From my family... to yours

Residents of Brisbane need to know more about the state government's proposal to dam the Mary River. They need to know it's a plan that is environmentally catastrophic, unsustainably expensive & would make very little difference to their water supply.

The *From my family... to yours* campaign is one way to introduce the Mary River to Brisbane households, in a manner that is personal and generous, and will draw more attention than ad campaigns, media articles or leaflet drops to letterboxes.

We encourage everyone who lives in the beautiful Mary River Catchment - from Maleny to Hervey Bay - to get involved in this awareness-raising exercise.

Take the letter enclosed in this pack, sign it from your family... add more of your personal story on the back of the letter if you wish (or photos or gifts), and post it, along with the book *Love, Mary* to a household in Brisbane selected at random from the white packs.

## Tip #2 - Add some electoral pressure!

*Send your book & letter to a family in a marginal electorate seat in the Brisbane region!*

Some suburbs in Brisbane have been identified as marginal electorate seats that will play a critical role in the upcoming state election. These suburbs are listed on the back of this brochure.

*Love, Mary* is a collector's item, the anthology of a campaign, with stunning photography and beautiful language. We want people in Brisbane to know the real story about our precious river, and what better way than by sending them a gift!

## From my family... to yours... the story that must be told!

You can help spread the word of this campaign locally too... encourage your friends and family who live along the Mary River to get involved... and send their own books to Brisbane.

Extra books can be ordered from [www.savethemaryriver.com/shop](http://www.savethemaryriver.com/shop) or by visiting the **Kandanga No Dam Info Centre** beside the Historic Kandanga Railway Station.

Phone the **Info Centre on 07 5488 4800** for a list of stockists near you.
